Profile: A hands-on full stack developer with a strong foundation in building scalable backend systems, secure EaaS platforms, and AI-integrated applications. Experienced with modern tech stacks like Node.js, React, Next.js, FastAPI, Kafka, and PostgreSQL, with a focus on clean architecture and real-world problem solving. Proven track record across internships, startup projects, and national-level hackathons, delivering solutions that are both technically solid and production-ready.

Work Experience

Backend Developer Intern – ParkingStha

(Feb 2025 – Jul 2025)

- Built and maintained scalable REST APIs using Node.js and Express, designed MongoDB schemas, and integrated real-time parking availability and booking features.
- Worked closely with frontend and mobile teams to ensure seamless API integration, optimized performance, and consistent data flow across the app and Integrated S3 with AWS sdk.

Software Development Engineer Intern – Pranaksha Technologies LL

(Nov 2024 – Jan 2025)

- Implemented a custom PDF export feature using React.js, jsPDF, and Tailwind CSS, making reporting smoother and more user-friendly.
 - Boosted backend performance by over 40% through PostgreSQL bulk data handling, and improved collaboration via GitHub workflows.
-

Projects

Cipherion – Encryption as a Service Platform

Live Demo: cipherion.in

- Built a full-stack EaaS platform with support for encryption, PII masking, tokenization, and anonymization for GenAI workflows.
- Designed a scalable microservices architecture using Kafka for log processing and FastAPI for high-performance encryption and PII anonymization services.

Tech Stack: Next.js, Tailwind CSS, ShadCN UI, Node.js, Express, PostgreSQL, FastAPI, Python, Kafka, TypeScript.

CognitLaw – AI-Powered Legal Assistant

Github: github.com/Nagraj-13/CognitLaw

- Built a legal assistant that uses LLMs and RAG pipelines to automate legal research and summarize documents and audio files.
- Implemented RabbitMQ-powered microservices to process long-running tasks like diarization and legal classification at scale.

Tech Stack: React, Redux Toolkit, Flask, Tailwind CSS, JWT, FAISS, MongoDB, Whisper, Gemini API, Hugging Face, RabbitMQ.

FlashCLI Fullstack Project Scaffolding Tool

Live Demo: flashcli.vercel.app

- Built a CLI tool that scaffolds production-ready frontend stacks with pre-configured Redux, Tailwind, ESLint, and Prettier.
 - Reduced boilerplate setup time by over 80 percent and enabled backend integration with MongoDB and logger configuration.
-

Technical Skills

Programming Languages: C++, Python, Java

Web Development: HTML, CSS, JavaScript, React Js, Next Js, Node Js, Express Js, MongoDB, PostgreSQL, Flask, FastAPI, Tailwind CSS, Redux, Tanstack / React query.

Tools: VS Code, Git, GitHub, Postman, Vercel, Netlify, Render, Docker, AWS Cloud

Soft Skills: Problem Solving, Communication, Critical Thinking, Time Management

Education

Bachelor of Engineering (Computer Science & Engineering)

Jain College of Engineering and Research, Belgaum (2012 - 2025)

CGPA: 9.1

Pre-University Course (PUC)

Gogte College of Commerce and Science, Belgaum (2019 - 2021)

Percentage: 88.87%

Secondary School (SSLC)

B K Model High School, Belgaum (2019)

Percentage: 90.45%

Achievements

- **Smart India Hackathon Winner:** Winner of Smart India Hackathon (SIH 2024), held at the Nodal Center, IIT Gandhinagar, for solving a real-world problem statement provided by Delhi Metro (DMRC) under the Ministry of Urban Affairs.
- **Research Publication:** Co-authored and published the paper "*Analysis and Implementation of IoT-Enabled EV Charging Station*" in Springer Journal, presented at the **ICADIE 2024** Conference.
- **3X Hackathon Winner.**
