

JOB TITLE: Lead Frontend React Developer

LOCATION: Austin, TX / Remote

DEPARTMENT: Product Engineering

EMPLOYMENT TYPE: Full-Time

JOB OVERVIEW

We are looking for a highly skilled Lead Frontend React Developer to spearhead our UI architecture. You will be responsible for creating intuitive, lightning-fast, visually stunning user interfaces for enterprise hiring managers and recruiters using React 19, Next.js 15, TypeScript, and Tailwind CSS.

KEY RESPONSIBILITIES

- Lead frontend architecture and establish visual design systems and reusable component libraries.
- Build responsive, accessible (WCAG compliant) dashboards and interactive data visualizations.
- Optimize application performance, rendering speeds, and bundle sizes across web and mobile viewports.
- Mentor junior frontend developers and enforce high standards of code quality and component testing.

REQUIRED QUALIFICATIONS

- 5+ years of software engineering experience focusing on frontend web development.
- Mastery of React, Next.js, TypeScript, HTML5, CSS3, and Tailwind CSS.
- Deep understanding of modern state management (Zustand, Redux, React Query).
- Proven track record of optimizing Web Vitals and performance scores.
- Experience writing automated unit and integration tests (Jest, React Testing Library, Cypress).

PREFERRED QUALIFICATIONS

- Experience with dark mode, glassmorphism, and modern UI micro-animations.
- Familiarity with Figma design file translation.
