

JOB TITLE: Senior DevOps & Site Reliability Engineer

LOCATION: Chicago, IL / Remote

DEPARTMENT: Site Reliability & Infrastructure

EMPLOYMENT TYPE: Full-Time

JOB OVERVIEW

We are seeking a Senior DevOps & Site Reliability Engineer to maintain and scale our multi-region cloud infrastructure. You will manage automated Kubernetes clusters, establish continuous integration and deployment (CI/CD) pipelines, and implement real-time monitoring and alert escalation.

KEY RESPONSIBILITIES

- Provision and maintain cloud resources on AWS using Infrastructure as Code (Terraform).
- Build and optimize fast, secure CI/CD pipelines for Next.js, Node.js, and Python microservices.
- Configure observability stacks using Prometheus, Grafana, Datadog, and ELK.
- Maintain 99.99% system availability and participate in automated on-call escalation rotation.

REQUIRED QUALIFICATIONS

- 4+ years of hands-on experience in DevOps, SRE, or Infrastructure Engineering.
- Deep knowledge of Kubernetes, Docker, Terraform, and AWS cloud ecosystem.
- Strong shell scripting skills (Bash, Python, Go).
- Demonstrated experience managing zero-downtime blue/green or canary deployments.

PREFERRED QUALIFICATIONS

- AWS Certified Solutions Architect or Certified Kubernetes Administrator (CKA).
